

MIXING DRUGS & ALCOHOL

What are the risks?

**It's always safest not to
take drugs at all, but if you
mix drugs and alcohol then
the risks often increase**

**The following
information is
taken from
drugsand.me**

SOS!UK

**Mixing alcohol with
KETAMINE even in small
amounts is likely to cause
impaired coordination,
nausea, vertigo and ‘the
spins’**

**The following
information is
taken from
[drugsand.me](https://www.drugsandme.uk/)**

SOS!UK

**Mixing alcohol with COCAINE
leads to the creation of
cocaethylene which is very
harmful to your heart and
liver, and increases your risk
of sudden death**
